POLLY PRODUCTS
PREMIUM RECYCLED PLASTIC FURNISHINGS
12 N. Charlotte St. Mulliken, MI 48861

Product Specifications

The term 'Green Products' is not new to Polly Products; our products were touted as green before being green was popular. We start our molding process by purchasing 100% recycled plastics, and add colorant and UV stabilizers to protect the finished products from the damaging rays of the sun.

Milk jugs, detergent bottles and plastic grocery bags are manufactured from polyethylene (HDPE or #2 plastic). Although our country has improved at recycling, over 70% of post-consumer plastic is currently still being buried in a landfill or burned in an incinerator. We not only manufacture all of our recycled plastic components right here in mid-Michigan, our craftsmen create and fabricate products that are shipped worldwide. Consumer waste becomes commercial grade furniture!

All products manufactured at Polly Products are comprised of post-consumer plastics and are made for commercial use and to last a lifetime. All plastic components are a minimum of 95% recycled plastic, with UV inhibiting protectants, colorant, and a mineral molding agent being the only added materials. This means every plastic component is fully **recyclable**, which can't be said for products containing fiberglass, metal or wood fillers. For every pound of product weight, we use approximately 8 1-gallon milk jugs. For example, it takes 3,200 milk jugs to produce an 8 foot long picnic table that weighs about 400 pounds! Recycled plastic is not only environmentally friendly but it is weather resistant, does not splinter, rust, rot or decay. We use stainless steel, rust-free fasteners and our plastic planks never require painting or staining. Therefore, the maintenance is minimal, consisting of simply an occasional washing to remove environmental grime or the use of detergent to remove ink or paint graffiti. And storage is never needed; we are built to last 4 seasons in all climates.
